

# Phytomedicine and Natural Products SHORT COURSE

Presented by the Department of Plant and Soil Sciences, University of Pretoria

The Phytomedicine and Natural Products short course will provide scientists and researchers specialising in the discovery of new natural products from plants, with practical and theoretical skills. This multidisciplinary course incorporates plant science, phytochemistry, pharmacology, plant pathology, as well as safety and efficacy issues of commonly used phyto-drugs – with emphasis on pharmaceutical and agricultural applications.

After successfully completing this course, you will be able to work at the interface between a specialised research environment and the more practical immediate problem-solving arena within a phyto-drug industry.

For more information or book your seat on this short course, visit
