Calling all innovators, problem solvers and designers!

# LABHACK ZIMBABWE

## ZIMBABWE LABORATORY EQUIPMENT HACKATHON

Can **YOU** help?

A lack of laboratory equipment often makes teaching science and technology difficult. Join a global community of creative problem solvers and put your creativity to the test with **REAL CHALLENGES**.

### The Challenge

To design low cost laboratory equipment that works and can be built locally.

Space is limited,  
so register your  
team now!

[labhackathon.com](http://labhackathon.com)

### Why participate?

You will show off your designs, get feedback from academics and industry sponsors, network with other engaged students, attend talks on Open Hardware, Responsible Design & Innovation, Intellectual Property, and much more!

### Who is invited?

LabHack is open to undergraduate students currently registered to a Zimbabwean university or college. You will be sponsored for your designs, and different challenges are open to 1st, 2nd and 3rd year students.

Hosted by the **University of Oxford** in collaboration with the National Biotechnology Authority and the NEPAD-Southern African Network for Biosciences.
